Lesson 3: Quiz - Attempt 1

1

Marks: 1

In Ruby, **nil** is an actual object.

Answer: ◯ True
◯ False

2

Marks: 1

Given the following string definition:

`str = 'ruby course'`

Which of the following snippets will convert the string to all uppercase (i.e. 'RUBY COURSE')?

Note: Multiple answers are allowed.

Choose at least one answer.

☐ A. str.upcase!

☐ B. str.uppercase!

☐ C. str.to_upper!

☐ D. str.swapcase!

☐ E. str.capitalize!

3

Marks: 1

Any method can be called with a block as an implicit argument.

Answer: ◯ True
◯ False

4   The following tests whether two strings are the same object.

Marks: 1

Choose one   ◯ A. ==
answer.
              ◯ B. String.eql?

              ◯ C. String.equal?

5   What is the output of the following code:

Marks: 1
```
foo = 'bar'
puts '1:#{foo}'
```

Choose one   ◯ A. 1: bar
answer.
              ◯ B. No output.

              ◯ C. 1:#{foo}

6   What is the output of this program?

Marks: 1
```
def try
if block_given?
yield
else
puts "no block"
end
end
try do puts "hello" end
```

Choose one   ◯ A. hello
answer.
              ◯ B. run-time error

              ◯ C. no block

7   Can you get several values from a Ruby method, in one statement?

Marks: 1

      Answer: ◯ True

                        ◯ False

---

8   In the following line of code:

Marks: 1
```
var = 0
```

      var is:

      Choose one ◯ A. a local variable
      answer.

                    ◯ B. an instance variable

                    ◯ C. a class variable

                    ◯ D. a global variable

                    ◯ E. none of the above

---

9   Is the following a valid Ruby program?

Marks: 1
```
=start
 # Hi there
=end
puts "Hello Ruby!"
```

      Answer: ◯ True

                        ◯ False

---

10   Both **false** and **nil** belong to the same class ie. **NilClass**

Marks: 1

      Answer: ◯ True

                        ◯ False
